

Little Piney Creek

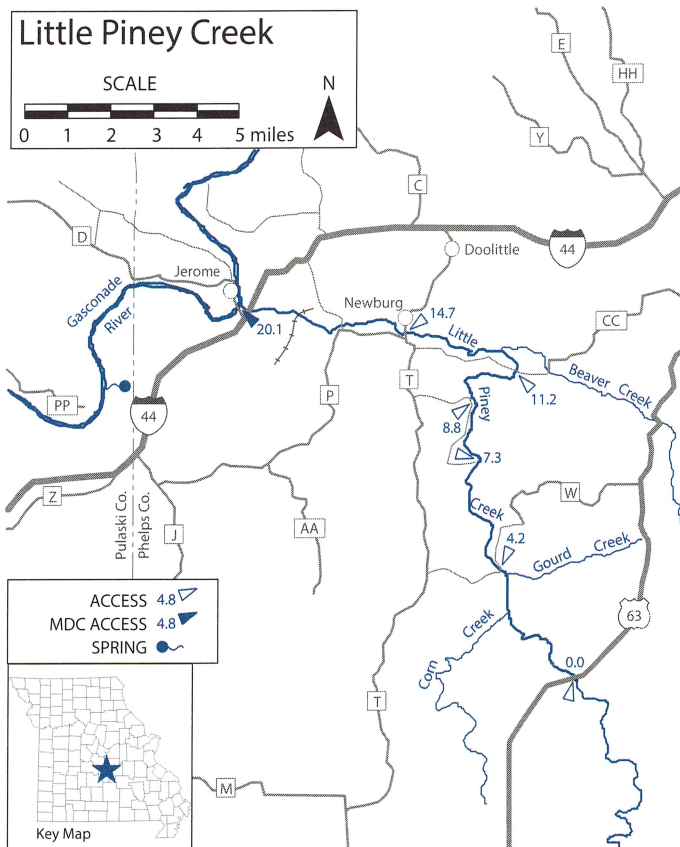

This tributary of the Gasconade is fed by many small springs, is a good fly-fishing stream and is frequently floatable with some wading. The lower 7.5 miles provide the best floating. The upper 10 miles has a lower gradient and less water.

Difficulty: I and II.

Gradients: Hwy. 63 to Beaver Creek — 8.2; to Gasconade River — 9.4.

County: Phelps.

- 0.0 Hwy. 63 Access.
- 0.6 Lane Spring has a daily flow of several million gallons. Lane Spring Recreation Area (Forest Service) and campground. Enter from Hwy. 63 east of river, on FS Road 1892.
