

Pomme de Terre River

The Pomme de Terre Reservoir has eliminated the central portion of this river for floating, but some floatable water remains in the sections above and below the lake. Relatively slow, but also relatively clear, the Pomme is a good river for beginning paddlers. Check with outfitters or the U.S. Army Corps of Engineers to see if water is being released from dam. During times of significant water release, there is serious risk in paddling on the lower Pomme de Terre River. Releases above 1,200-1,500 cubic feet per second can make the current dangerous.

Difficulty: I.

Gradients: generally about 3; Sunset Bridge to Hwy. 32 area — 5.4; to Pomme de Terre Reservoir — 3.9; Dam to Sapp Landing Access — 2.4.

Counties: Polk, Hickory.

land on both sides of river from here to lake.

13.6 **Cross Timbers Access.** Two miles north of Hwy. 54 on Route B, 5.5 miles east on Route Y until the pavement ends, then 0.75 mile south on County Road 281.
